## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 3-8, 10 and 12-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Ruby et al. (US 2004/0172798).
- 3. With respect to claims 1 and 3, figures 1-28 of Ruby teach a FBAR device comprising:

A substrate structure (14) provided with an upper surface;

A seed layer (fig 13, 34) formed on the upper surface of the structure and made of one selected from gold and titanium (claims language allows for use of AlN); and

One or more acoustic resonant portions, each including a lower electrode film formed (38) the seed layer and made of Mo, a piezoelectric layer (34) formed on the lower electrode film made of aluminum nitride and upper electrode film (58) formed on the piezoelectric layer.

4. With respect to claims 4 and 5, figure 20 of Ruby discloses an air gaps on surfaces.

Application/Control Number: 10/601,658 Page 3

Art Unit: 2819

5. With respect to claims 6 and 7, figure 20 of Ruby discloses an air gap (28) on the surface of the substrate.

- 6. With respect to claim 8, figure 20 of Ruby discloses the membrane layer is mode of silicon glass (which contains Silicon oxide).
- 7. With respect to claims 10 and 12-17, the methods therein are inherent given the apparatus of Ruby as shown in the above rejections.

## Allowable Subject Matter

- 8. Claims 2, 9, 11 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 9. The following is an examiner's statement of reasons for allowance:

With respect to claims 2 and 11, the prior art does not teach another layer made of Ta formed between a seed layer and a substrate structure.

With respect to claim 9, the prior art does not teach a substrate of two or more layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
